

# Canada

by the global numbers\*

*centreforenergy.com*

2

Canada's world ranking in crude oil reserves (175 billion barrels) and hydroelectricity generation (368 terawatt-hours)

3

Canada's world ranking in natural gas production (16.2 billion cubic feet per day)

4

Canada's world ranking in ethanol production capacity (10,300 barrels per day)

5

Canada's world ranking in primary energy production (19.4 quadrillion Btu)

6

Canada's world ranking in crude oil production (3.3 million barrels per day)

7

Canada's world ranking in primary energy consumption (13.8 quadrillion Btu)

10

Billion cubic feet of natural gas exported to the United States every day

26

Per cent of Canada's total exports that were energy related

126

Billion dollars worth of energy exports

679

Million barrels of crude oil exported to the United States

by the domestic numbers\*

*centreforenergy.com*

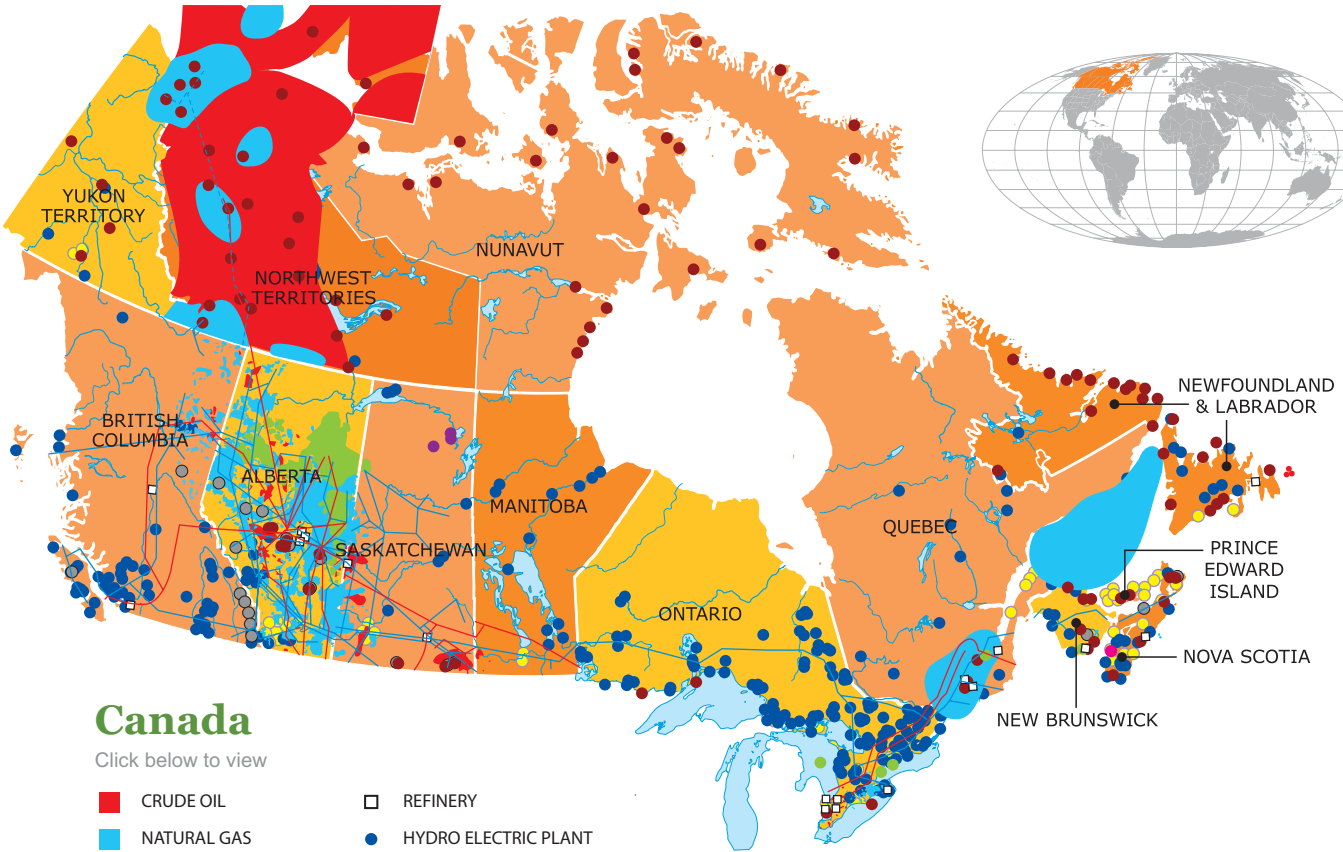

2	Per cent of Canada's primary energy production contributed by nuclear energy
3	Million barrels per day of oil production
7	Per cent of Canada's primary energy production contributed by hydropower
8	Per cent of Canada's primary energy production contributed by coal
15	Per cent of Canada's electricity produced from nuclear generation
23	Per cent of Canada's electricity produced from thermal generation
40	Per cent of Canada's primary energy production contributed by crude oil
43	Per cent of Canada's primary energy production contributed by natural gas
62	Per cent of Canada's electricity generated from hydropower
598	Terawatt-hours of total electricity generation
16,157	Million cubic feet per day of marketed natural gas production
